### **Chairman's Review**

The economic recovery in 2000 was encouraging for South East and East Asia although challenges remain. Political uncertainty in some countries and the possibility of an economic slowdown in the West may have some adverse effect on the growth rate of the region. Sentiments in certain sectors of the economy were weaker than expected.

Strategies and policies which are continually being reviewed and updated by management in view of the fast changing economic environment have resulted in the QAF Group maintaining its momentum of growth both in terms of turnover and profits. Turnover increased by 6% to \$487.5 million while profit after tax, rose by 9% to \$16.4 million.

The Group's operating units have established themselves firmly as leaders in the main markets that they operate in. It is my firm belief that the Group will not only continue to remain a dominant force in existing markets but will enter into new markets with good growth potential.

As such, I am confident that the record growth will continue unabated in the future.

The Directors are pleased to recommend a first and final dividend of 1.6 cents per stock unit less tax at 24.5 % (1999: 1.6 cents per stock unit less tax at 25.5%) for the financial year ended 31 December 2000.

Lastly, but not least, I must emphasize that the success of the Group is dependent greatly on the support shown by all the stockholders, customers, employees, principals, suppliers and business associates. I wish to thank them all.

### **Group Managing Director's Report**

The QAF Group has made another achievement for the financial year ended 31 December 2000. Turnover increased 6% to \$487.5 million from that of \$460.0 million in financial year ended 31 December 1999. Profit before tax increased by an even larger 17% to \$23.6 million. Group taxation, however, increased 64% to \$6.4 million in financial year 2000 as compared to \$3.9 million in financial year 1999 due mainly to the restoration of corporate income tax for our Malaysian operations after a tax free year given by the Government of Malaysia in 1999. Despite this, the Group still recorded an increase in profit after tax by 9% to \$16.3 million in financial year 2000 as compared to a profit after tax of \$15.0 million in financial year 1999.

price wars and aggressive promotions on the part of competitors, Gardenia maintained its leading position in the bread market. Consumers still associate Gardenia with the attributes of quality, freshness, tastiness and value for money. Operating margins improved with the increased sales of new products as well as higher productivity and efficiency. In February 2001, Gardenia Singapore completed its acquisition of the Bonjour bakery operations, a major competitor in the Singapore market. The integration of the Bonjour range of products and its existing operations with that of Gardenia's will not only increase market share but will result in substantial gains from economies of scale, productivity and rationalization of operations. Our customers will also be more efficiently served with better products.

Profitability increased for the Gardenia Singapore operations. Although the year saw

The Singapore operations will concentrate on the introduction of new products to meet the needs of consumers. Effective promotion programmes are being constantly formulated to reach out to the various market segments.

The Malaysian arm of the Gardenia operations, Gardenia Bakeries (KL) Sdn Bhd, increased its sales and moved further ahead of its competitors. The product range was

expanded to cater to the needs of the growing market. As all four existing plants are now operating at full capacities, the Company is constructing its fifth plant at Bukit Kemuning which should be operational by the latter half of 2000. GBKL is expected to maintain its growth momentum when the new plant begins commercial production.

In January 2001, the QAF Group entered into a strategic alliance with Padiberas Nasional Berhad ('Bernas') a Malaysian Company that is listed on the Kuala Lumpur Stock Exchange. Bernas is a leading player in the processing, trading and distribution of rice and other food products in Malaysia. As the first step in our strategic alliance, the QAF Group has entered into a conditional agreement to sell a 30% stake in GBKL to Bernas for RM54.8 million (S\$25 million, approximately).

Both the QAF and Bernas Groups will jointly explore investment opportunities in the food industry. The prospect is exciting as both Groups have carefully built up a reservoir of experience and expertise over the years which can be used to successfully manage our investments. Furthermore, the extensive distribution networks maintained by both Groups - 12,500 distribution points for GBKL and 17,000 for Bernas - constitute a powerful platform for the distribution of other food products. Both Groups will explore possible investments in the manufacturing and distribution of flour, biscuits, cooking oil and other rice and/or wheat based food products.

We are also heartened by the good performance of our bakery operations in the Philippines. The Gardenia brand is now the leading brand in the Metro Manila market and has achieved the largest market share. Gardenia Philippines is aggressively promoting its growth through the introduction of new products and effective sales and promotion programmes. Gains were also made in the area of production and distribution efficiencies.

Due to the high growth in sales, the present plant has reached full capacity within a short period of time. Work has begun to install a second production line which should begin commercial production in the latter part of 2001.

QAF Limited

The supermarket operations in Singapore, under Shop N Save, have increased the number of its stores by 20% to 30. We are now ranked as one of the largest chains in Singapore, both in terms of market share and number of stores. The industry was affected by the general decline in consumer confidence in the second half of 2000. Inspite of this, Shop N Save remained profitable and has maintained its growth momentum.

The distribution companies, Ben Foods (S) in Singapore and Ben Trading (M) in Malaysia, performed well in the financial year 2000. Their strategy of developing their own proprietary brands have been largely successful. The proprietary brands of Farmland, Cowhead and Orchard Fresh are now established consumer brands in the food and beverage industry. The newly acquired Haton brand of seafood products has also been well received by the market and promises to contribute to the growth of Ben Foods (S) in the near future. The wine division of Ben Foods (S) is growing with the addition of several exclusive brands.

Here's what's

growing in the future ahead.

Cold storage operations under NCS Stores (S) and QAF Fruits Cold Store also performed well in 2000. NCS Cold Stores' efforts to use the period of economic slowdown and overcapacity in 1998 and the first half of 1999 to upgrade their equipment and services have borne fruit. Occupancy rates have risen to 95% and the number of new customers increased significantly.

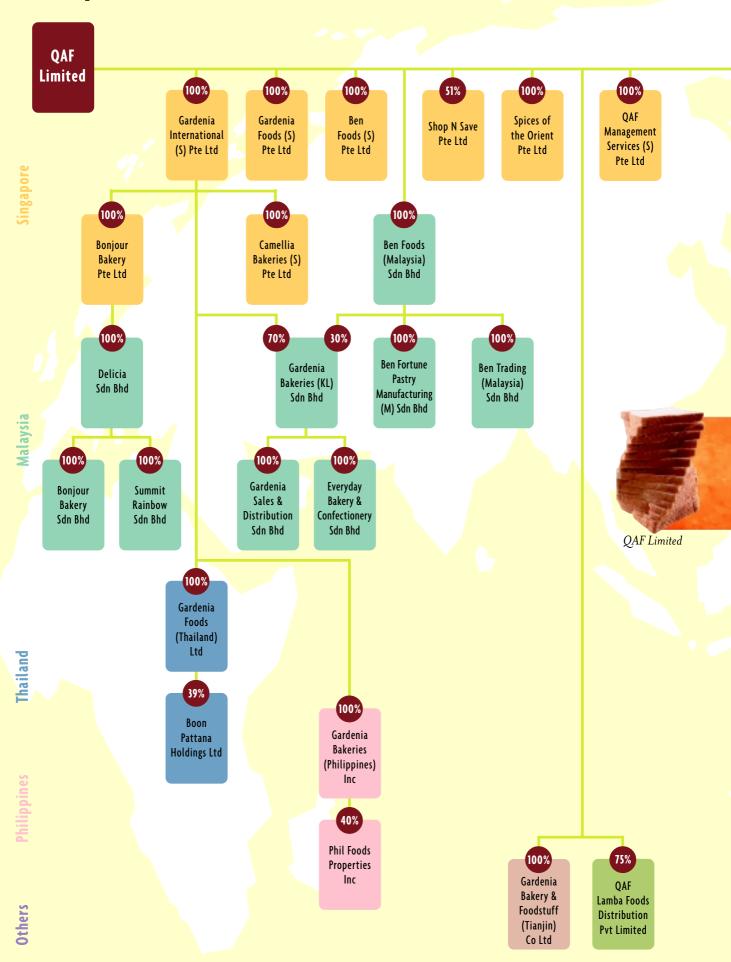

The QAF Group is in a very healthy financial position with strong operating cash flows. The Balance Sheet is also strong with negligible Group borrowings and a solid capital structure. While the Group has achieved its target for 2000, we are well prepared and confident of reaching higher milestones. We are continuing our efforts to seek out acquisition opportunities which will further our growth momentum.

### **Operational Review**

#### FOOD MANUFACTURING

#### Gardenia Foods (S) Pte Ltd ('Gardenia Singapore')

Gardenia Singapore saw increased profitability despite stiff competition in the form of aggressive promotions with rebates and heavy price discountings. The Gardenia brand maintained its dominant market share in the branded bread market and margins improved through the introduction of a new range of products as well as improved efficiency and productivity. The higher operating profits more than offset the hefty increases in the prices of electricity, fuel, gas as well as personnel costs faced by the industry in 2000.

The year 2000 also saw an increased presence of cheaper products from neighbouring countries. Gardenia responded to the challenge by improving customer servicing and introducing effective marketing and promotion activities.

Gardenia Singapore launched the Jumbo 600, a larger extension of the Gardenia Enriched White Bread, in May 2000. This new product, which retails at \$1.80, proved to be a hit with the bigger families in Singapore and provides Gardenia an opportunity to enter the institutional market segment comprising caterers, hospitals and airlines.

QAF Limited

In August 2000, Gardenia participated as a sponsor in the National Day celebrations for the second year running. To coincide with Singapore's 35th birthday celebrations, Gardenia Singapore launched two new buns. 150,000 spectators and participants had the opportunity to savour the Gardenia Tuna Bun and the Gardenia Tropicana Bun before their launch in the retail market.

Freshly baked to a traditional American Recipe, the Gardenia Tuna Bun contains a low fat filling of tuna flakes which is high in Omega-3 fatty acid, an ingredient which is beneficial to health. Gardenia Tropicana Bun contains the finest grade of tropical fruits like mango, papaya and pineapple. Both buns are retailing at \$0.70.

To welcome the festive season in the later part of the year, the Company launched its Festive Loaf Special with a new improved recipe. Baked by Gardenia's characteristic American Sponge and Dough method, this 500 gm Festive Loaf is filled with wholesome and natural ingredients such as sweet and juicy cranberries, succulent California raisins, crunchy almonds, tangy citrus peel and a hint of cinnamon. Priced at \$4.00 per loaf, the Gardenia Festive Loaf was available for a limited period during the festive season.

Several new initiatives in the area of sales promotion were made during the year. In March 2000, a "Home Baked Fresh" campaign was launched which introduced a 20 second TV commercial as well as new improved packaging. This campaign was further extended to a nationwide "Fresh Ways to Win" contest for consumers which was held in September and October. To participate in this contest consumers just had to send in any 2 Gardenia loaf packagings and they could win cash prizes totalling \$60,000. This promotion was extremely successful and attracted a record number of entries.

Gardenia Singapore also participated in the Halal Food Fiesta in June 2000. This five day exhibition presented Gardenia with an opportunity to enhance its brand franchise with the Muslim community. With a turnout of about 40,000 people, Gardenia definitely made its presence felt with activities such as product sampling, a

Gardenia Creative Sandwich Competition and the making of the longest sandwich in aid of charity.

In September, Gardenia Singapore also participated in a 5 day Heart Expo 2000 exhibition. This event provided Gardenia another opportunity to showcase and promote its healthy range of high fibre and wholemeal products. Gardenia was the official bread sponsor of the "Snoopy's Birthday Celebrations Show" at the Singapore Expo. More than

90,000 visitors attended the IO day exhibition. About I90 schools took part in the "Gardenia Best Dressed Snoopy Contest" where they had to dress Snoopy in the most creative manner using only Gardenia wrappers. The winner was Serangoon Garden Secondary School who will represent Singapore in an international competition in the US.

#### Gardenia Bakeries (KL) Sdn Bhd ('GBKL')

GBKL had another successful year of operations. Margins were maintained despite escalations in certain production cost components such as packaging materials, diesel and toll rates.

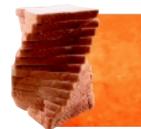

With strong branding exercises, a good range of high quality products, a very extensive distribution network and the persistent work of R&D, GBKL continues to move further ahead of the competition. In this respect, The Gold Medal range of premium sandwich bread was successfully launched. This was followed by 2 variants of 'Fun in a Bun'.

The year under review also saw a very intensive upgrade of GBKL's merchandising program to cater to the expanded product range as well as to strengthen Gardenia's premium brand image. New stand designs were placed in the market and special displays were arranged with high traffic outlets.

QAF Limited

New products are currently being developed in GBKL's Research & Development Centre and they should be ready for launching in the year 2001. The products will enable GBKL to enter new market segments and broaden the Company's market base. Preliminary findings seem to indicate that these products have potential and should lead to further growth in terms of turnover and profits.

Growth rates have been so rapid that all four existing plants are now running at full capacities. An additional new plant, GBKL's fifth, is currently under construction in Bukit Kemuning and should be on stream by the third quarter of year 2001. We are beefing up our resources in logistics to prepare ourselves for the additional sales which will be generated by this plant.

#### Gardenia Bakeries (Philippines) Inc ('Gardenia Philippines')

Gardenia Philippines had a very successful year in 2000. Gardenia has been rapidly established as the leading brand in the Metro Manila market with the largest market share. Sales grew by a very encouraging 66% while profitability from bread operations has improved significantly.

The Gardenia brand is now the fastest selling brand of sandwich bread in the Metro Manila market and has attracted a sizeable and loyal customer base. More and more consumers are associating the Gardenia products with the unique attributes of taste, freshness, aroma, softness and wholesomeness. The Company is aggressively increasing product awareness in the market through advertising, in-store promotions, product sampling and joint-promotions with other products. Gardenia's innovative, unique and effective approaches in the areas of merchandising

and promotion have become the envy of competitors so much so that they are trying to follow Gardenia's marketing styles. Market information shows that only Gardenia is experiencing significant growth while other major competitors are registering declines in sales.

Here's what's
behind our success,
and
what will keep us
growing in
the future ahead.

<sup>page</sup>14/15

The rapid growth in sales was attributable mainly to aggressive market penetration with the opening of new accounts in supermarkets, petrol stations and mini-marts. This expansion was supported by vigorous advertising and promotional campaigns using creative messages through the media. A new channel of distribution was introduced with the inauguration of direct home delivery services in the districts of Ayala Alabang and Makati.

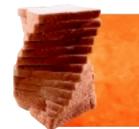

New products such as specialty bread (California raisin and Chocolate Chip), hotdog buns, hamburger buns and Choco Filled Buns were also introduced during the year and their contributions to Gardenia Philippines look promising. The momentum gained by these efforts should lead to another high growth year in 2001.

Significant improvements were made in the production and distribution operations which led to gains in efficiency and reduced distribution costs. As a result, gross margins were markedly increased despite

increases in raw material costs resulting from higher oil prices and the devaluation of the peso.

As sales have grown above original expectations, the present plant is operating at full capacity. The Company is now upgrading its premises and installing a second production line. This line should come on stream in late 2001.

QAF Limited

#### Gardenia Foods (Thailand) Ltd ('Gardenia Thailand')

The performance of Gardenia Thailand was hampered by intense competition. The industry was affected by a shakeout with many independent bakeries shutting down. Price-cutting and heavy in-store promotions were used by all the major bread manufacturers. Amidst adverse market conditions, Gardenia Thailand still managed to maintain its position as the No. 2 brand in terms of share in the Thai bread market.

Gardenia Thailand has embarked on a programme of rationalisation of product lines. New product lines, which cater to the taste of the consumers such as vegetarian bread (with vitamin additives) and butter slice with honey, differentiate Gardenia bread from others. At the same time, products with limited growth potential have been terminated.

#### TRADING, DISTRIBUTION, RETAILING AND COLD STORAGE

#### Shop N Save Pte Ltd ('Shop N Save')

The general retail and supermarket industry in Singapore was affected by weak consumer sentiments in the later half of 2000. Cost also increased due mainly to higher electricity charges. Despite these difficult conditions, Shop N Save remained profitable and continued to expand which is in line with the Company's plan to establish itself as one of the leading supermarket chains in Singapore.

Here's what's
behind our success,
and
what will keep us
growing in
the future ahead.

<sup>þage</sup>16/17

Shop N Save opened 6 new stores in 2000, bringing the total number of stores to 30. New stores opened in 2000 include Woodlands North Plaza, Vista Point (in Woodlands), Ang Mo Kio 2 (the second in the Ang Mo Kio area), Yishun 2 (the second in the Yishun Area), Tampines Block 506 and Serangoon North. The Shop N Save chain is now one of the leading supermarket chains both in terms of market share and the number of retail outlets.

More of our stores are opening earlier for the convenience of our customers with 9 more of our stores opening at 7.00 am, bringing the total number of stores which open at 7.00 am to 22. The early morning opening concept is being received enthusiastically by our customers.

In September 2000, the Company was awarded the People Developer Standard Award. This award from the Singapore Productivity and Standards Board (PSB) was given in recognition of Shop N Save's total commitment to train and develop its staff to meet the Company's business goals. In addition, 21 staff members were recognised publicly by the PSB in December for their excellent service.

Shop N Save will face new challenges in 2001. The industry will undergo a structural change with the entrance of hypermarkets, the growth of chain convenience stores as well as a shake-out of mid-size chains, independent stores and the traditional provision shops. Given the situation, Shop N Save is challenged to carve out a niche for itself and maintain its momentum to establish itself as a major player in the supermarket industry.

QAF Limited

# Ben Foods (S) Pte Ltd ('Ben Foods') And Ben Trading (M) Sdn Bhd ('Ben Trading')

Ben Foods, a leading distributor of food and beverage products in Singapore, achieved higher profits in 2000. This is commendable in view of the softer market situation.

Here's what's behind our success, and what will keep us growing in the future ahead.

<sup>page</sup>18/19

Profitability was due, to a large extent, on the Company's ability to build on its proprietary brands such as Farmland, Cowhead and Orchard Fresh. The Company has added seafood products to its list of proprietary brands with the recent acquisition of the Haton brand of seafood products. The design of the Haton range of canned seafood products was revamped to increase the brand's profile. Two new products were launched during the year - Snow Top Shell and Bamboo Asparagus Clam. The Company also entered the frozen seafood market by launching Haton Fish Fillet, a convenient and ready to eat product. These new products have been well received by the trade.

The wine division is facing increasing demand. As such, the range of wine has been expanded by the acquisition of the exclusive distributorship of Domaine St. George California Wines and Bay & Newton Johnson South African wines.

Domaine St. George is a renowned group of exclusive handcrafted wines. The wines are released under the label 'STG' which is the monogram of "St George". The winery released an estate-bottled Russian River Valley Cabernet Sauvignon from its own vineyards. Only limited amounts are produced each time. The South African winery of Bay & Newton Johnson, located along the Atlantic Ocean coastline of South Africa, provides a good range of fruity flavoured wines for easy drinking.

Ben Foods is confident that the strategy of developing inhouse proprietary brands will enable the Company to establish its own market niche and maintain its position in the market.

The Malaysian distribution arm, Ben Trading, achieved

significantly higher operating profits in 2000. The Company was successful in its strategy of focusing on higher margin proprietary brands and agency lines while applying stringent cost control and good trade credit policies. Plans are on foot to develop and market new products in 2001 which should put Ben Trading on a very strong platform for future growth.

# Ben Fortune Pastry Manufacturing (M) Sdn Bhd ('Ben Fortune')

SIG

Ben Fortune achieved profitability in its operations amidst a highly competitive environment. More export customers

were secured while new products such as French Garlic Bread and Italian Pizzetta helped the Company maintain its position in the local market. New products are targetted to be launched in 2001 for the export market which should ensure that the Company maintains its profit growth.

#### NCS Cold Stores (S) Pte Ltd ('NCS')

After experiencing a downturn in the frozen storage industry in 1999, NCS posted strong growth in 2000. Much of the increase can be attributable to measures taken by the Company during the downturn to increase productivity and efficiency including

investments in state of the art equipment. The number of new customers increased and average occupancy rates have reached 95%.

NCS is continually searching out ways to provide efficient service for its customers and the Company will invest and install new compressors this year to replace older units. The new compressors will be operational in mid-2001.

Turnover and profitability should improve further in 2001 as rental rates, which were reduced during the last recession, are restored.

#### Spices Of The Orient Pte Ltd ('SOTO')

SOTO has maintained its reputation for providing high quality spices for its customers. Purchases of raw materials are made directly from overseas sources. This reduces dependence on local suppliers who tend to charge higher prices.

Sales revenue increased by more than 21% while profitability also improved significantly.

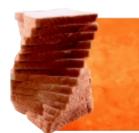

Operating expenses were further trimmed through rationalisation.

The 'Spices Of The Orient' brands of seasonings and spices are made for the convenience

of customers as they are easy to use for food preparation. The products are also widely available in most retail outlets. During the year, new products such as a range of curry powders packed in easy to use satchets were introduced.

In addition to products produced for the consumer, SOTO also provides contract packing and grinding services.

The financial statements are prepared in accordance with Singapore Statements of Accounting Standard and the applicable provisions of the Companies Act.

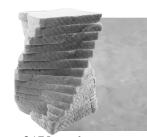

#### (b) Basis of consolidation

The financial statements of the Group include the financial statements of the Company and all its subsidiaries made up to the end of the financial year. #### 2. Summary of significant accounting policies (cont'd)

#### (d) Associated companies

The Group treats as associated companies those companies in which a long term equity interest of between 20 and 50 percent is held and over whose financial and operating policy decisions it has significant influence.

Associated companies are accounted for under the equity method whereby the Group's share of profits less losses of associated companies is included in the consolidated profit and loss account. The Group's share of the post-acquisition reserves of the associated companies is included in the investments in the consolidated balance sheet. These amounts are taken from the latest audited financial statements of the companies concerned, made up to the end of the financial period of the Group. Where the accounting policies of associated companies do not conform with those of the Group, adjustments are made on consolidation where the amounts involved are considered significant to the Group.

#### (e) Goodwill

Goodwill represents the excess of the fair value of the consideration given over the fair value of the identifiable net assets of subsidiary companies and associated companies when acquired. Goodwill is written off against reserves at the point of its acquisition.

#### (f) Property, plant and equipment

Property, plant and equipment are stated at cost or valuation less accumulated depreciation. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use. Expenditure for additions, improvements and renewals are capitalised and expenditure for maintenance and repairs are charged to the profit and loss account. When assets are sold or retired, their cost and accumulated depreciation are removed from the accounts and any gain or loss resulting from their disposal is included in the profit and loss account.

#### (g) Depreciation

No depreciation is provided on freehold land and for construction-in-progress until it is completed and put into use.

Depreciation is calculated so as to write off the cost of other property, plant and equipment, including those held under finance leases, on a straight-line basis over the expected useful lives of the assets concerned. The principal annual rates used for this purpose are:

Fully depreciated assets are retained in the financial statements until they are no longer in use and no further charge for depreciation is made in respect of these assets.

#### 2. Summary of significant accounting policies (cont'd)

#### (h) Investments

Long term investments, including investments in subsidiaries and associated companies in the financial statements of the Company, are stated at cost and provision is made for any diminution in value, which is other than temporary, determined on an individual basis.

Dividend income is recorded gross in the profit and loss accounts in the accounting period in which a dividend is declared payable by the investee company or in the case of subsidiary companies, in respect of which it is proposed. Interest income is accrued on a day to day basis. Profits or losses on disposal of investments are taken to the profit and loss account.

Investments held as current assets are stated at the lower of cost and market value.

#### (i) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is primarily determined on a weighted average basis, or first-in-first-out basis for certain subsidiary companies, and includes all costs in bringing the inventories to their present location and condition. In the case of manufactured products, cost includes all direct expenditure and production overheads based on the normal level of activity. Net realisable value is the price at which the inventories can be realised in the normal course of business after allowing for the costs of realisation and, where appropriate, the cost of conversion from the existing state to a finished condition. Provision is made where necessary for obsolete, slow-moving and defective inventories.

#### (j) Revenue recognition

Revenues from the sale of goods and services are recognised upon passage of title to the customer which generally coincides with their delivery and acceptance.

Dividend income is recorded gross in the profit and loss accounts in the accounting period in which a dividend is declared payable by the investee company or in the case of subsidiary companies, in respect of which it is proposed. Interest income is accrued on a day to day basis. Profits or losses on disposal of investments are taken to the profit and loss account.

Tax expense is determined on the basis of tax effect accounting using the liability method. Deferred taxation is provided on significant timing differences arising from the different treatments in accounting and taxation of relevant items except where it can be demonstrated with reasonable probability that the tax deferral will continue for the foreseeable future. In accounting for timing differences, deferred tax benefits are not accounted for unless there is reasonable expectation of their realisation.

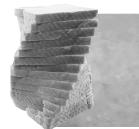

#### (l) Intangibles

Intangibles are stated at cost less amounts amortised to the profit and loss accounts.

- (i) Pre-operating expenses are written off in equal amounts over a period of 5 years.
- (ii) Trademarks are amortised in equal amounts over a period of 20 years.

#### (m) Borrowings costs

Borrowing costs are recognised as expenses in the period in which they are incurred.

The tax charge for the Group differs from the amount determined by applying the Singapore tax rate of 25.5% (1999 : 26%), primarily because of the tax savings arising from the utilisation of tax losses and unabsorbed capital allowances brought forward and reinvestment allowances applicable to certain subsidiary companies.

At 31 December 2000, the Group has unutilised tax losses and capital allowances of approximately \$10,010,000 (1999: \$12,654,000) and \$1,948,000 (1999: \$4,596,000) respectively which can, subject to the provisions of relevant local tax legislations and subject to the agreement with the relevant tax authorities, be carried forward and utilised to set off against future taxable profits.

The tax charge for the Company is higher than the amount determined by applying the Singapore tax rate of 25.5% (1999 : 26%) to profit before taxation primarily due to certain expenses that are not deductible for tax purposes.

No provision for diminution in value has been provided for the quoted equity shares in corporations as the directors are of the opinion that the shortfall in market value is not permanent.

Included in the net carrying value of unquoted equity shares in corporations is an investment in Luoyang Chundu Industry Company Ltd ("LCIC") amounting to \$2,940,000 (1999: \$4,127,000).

On 28 October 1998, a subsidiary company entered into a Sale and Purchase Agreement ("SPA") together with co-investors to dispose of its investment of approximately \$11,800,000 in the unquoted equity shares of LCIC. Pursuant to the SPA, the net proceeds on sale of approximately \$12,900,000 is receivable in three instalments, with the last instalment receivable no later than June 2000. The transfer of the shares held by the subsidiary company is conditional upon the receipt of the final instalment of the proceeds on sale. In the event that the purchaser cannot fulfil the conditions under the SPA, the purchaser will transfer its shareholding in LCIC to the subsidiary company and its co-investors respectively, as liquidated damages. The sale and profit of approximately \$1,100,000 arising from the disposal will be recognised upon completion of the conditions in the SPA.

To-date, total proceeds, net of expenses, amounting to \$7,978,000 (1999 : \$6,966,000) have been received and set-off against the cost of investment of LCIC.

The subsidiary company and its co-investors are presently working on a scheme to securitise the debt owed by its purchaser with shares of a company owned by the purchaser. These shares are "A shares" listed on the Shenzhen Stock Exchange. The directors are of the opinion that no further provision for diminution is required at the date of this report.
