1(d)(ii) Details of any changes in the company's issued share capital.

Since 30 September 2019 up to 31 December 2019, there has been no change to the issued and paid-up share capital of the Company.

1(d)(iii) Total number of issued shares excluding treasury shares.

As at <u>As at</u> 31/12/2019 31/12/2018

Total number of issued shares (excluding treasury shares) 575,268,440 575,268,440

No treasury shares are held by the Company during the year under review.

1(d)(iv) Statement showing all sales, transfers, cancellation and/or use of treasury shares as at the end of the current financial period reported on.

There was no sale, transfer, cancellation and/or use of treasury shares of Company during the year under review.

1(d)(v) Statement showing all sales, transfers, cancellation and/or use of subsidiary holdings as at the end of the current financial period reported on.

The Company did not have any subsidiary holdings as at 31 December 2019.

There was no sale, transfer, cancellation and/or use of subsidiary holdings during the year under review.

2. Whether the figures have been audited or reviewed, and in accordance with which auditing standard or practice.

The figures have not been audited or reviewed.

3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of matter).

N.A.

4. Whether the same accounting policies and methods of computation as in the company's most recently audited financial statements have been applied.

The Group has applied the same accounting policies and methods of computation as in the Group's audited financial statements for the previous year ended 31 December 2018. However, the Group adopted new or amended Singapore Financial Reporting Framework (International) ("SFRS(I)") and interpretations that are mandatory for financial years beginning on or after 1 January 2019.

Other than the impact on adoption of the SFRS(I) 16 *Leases* that is effective on 1 January 2019, the adoption of new or amended standards and interpretations is assessed to have no material impact on the financial performance or position of the Group and the Company.

5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

SFRS(I) 16 Leases

SFRS(I) 16 requires lessees to recognise most leases on balance sheets. The standard includes two recognition exemptions for lessees – leases of 'low value' assets and short-term leases. SFRS(I) 16 is effective for annual periods beginning on or after 1 January 2019. At commencement date of a lease, a lessee will recognise a liability to make a lease payment (i.e. the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e. the right-of-use ("ROU") asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset in the income statement.

The Group adopted SFRS(I) 16 on 1 January 2019, using the modified retrospective approach, without restating prior years' information.

On adoption of SFRS(I) 16, the Group and the Company recognised an amount of ROU assets equal to the lease liabilities of \$39.0 million and \$0.3 million, respectively, as at 1 January 2019. Subsequent to initial recognition, the Group and the Company will depreciate the ROU assets over the shorter of the useful life of the ROU assets and the lease term, and recognise interest expenses on the lease liabilities.

The adoption of SFRS(I) 16 resulted in an increase in total assets and total liabilities, Earnings before Interest, Tax, Depreciation and amortisation ("EBITDA") and gearing ratio.

6. Earnings per ordinary share ("EPS") of the group for the current financial period reported on and the corresponding period of the immediately preceding financial year:

	Full year ended			
	31/12/2019	31/12/2018		
Basic and Diluted EPS	4.8 cents	1.4 cents		
Number of shares used for the calculation of Basic and Diluted	EPS:			
Weighted average number of ordinary shares in issue	575,268,000	570,938,000		

7. Net asset value for the company and group per ordinary share based on the total number of issued shares excluding treasury shares of the company at the end of the period reported on and immediately preceding financial year:

	As at <u>31/12/2019</u>	As at 31/12/2018
Group	88.2 cents	88.9 cents
QAF Limited	54.9 cents	55.9 cents
Number of shares used for the calculation of Net asset value:	575,268,440	575,268,440

Review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. The review must discuss any significant factors that affected the turnover, costs and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors. It must also discuss any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.

Group revenue increased by 5% to \$224.4 million for the fourth quarter ended 31 December 2019 ("4Q 2019") from \$213.4 million for the fourth quarter ended 31 December 2018 ("4Q 2018"). In constant currency terms, Group revenue increased by 7% in 4Q 2019 over 4Q 2018. Group earnings before interest, tax, depreciation and amortisation ("EBITDA") increased by 139% to \$36.1 million for 4Q 2019 from \$15.1 million for 4Q 2018. Excluding the impact of the adoption of SFRS(I) 16 *Leases* (as explained in Section 5 on page 10), which resulted in an increase in EBITDA of \$2.6 million, Group EBITDA would have increased by \$18.4 million or 122%. The increase is due to better performance of Primary Production segment.

Despite higher sales, the Group's costs of materials decreased by 6% or \$6.8 million to \$110.4 million in 4Q 2019 mainly due to the recognition of \$7.3 million gain on revaluation of biological assets in line with higher selling prices. Amortisation and depreciation increased by 33% or \$2.9 million to \$11.6 million in 4Q 2019 due primarily to additional depreciation charge of \$2.2 million incurred from the recognition of ROU assets due to new accounting standard on leases (as explained in Section 5 on page 10). This was offset by a corresponding decrease in operating lease rental expense and costs of materials in 4Q 2019. There was also higher depreciation of \$0.8 million with the commencement of operations of the new plants in the Philippines.

The Group's utilities decreased by 10% or \$0.7 million to \$6.2 million in 4Q 2019 due mainly to decrease in Rivalea Holdings Pty Limited's ("Rivalea") electricity and gas usage with the commissioning of its third biogas generator. Advertising and promotion expenses increased by \$1.0 million to \$2.2 million in 4Q 2019 as compared to 4Q 2018 because there was a write-back of certain provisions no longer required in 4Q 2018.

Other operating expenses decreased by 17% or \$3.7 million to \$17.5 million in 4Q 2019 as compared to \$21.2 million in 4Q 2018 due mainly to foreign currency translation gain in 4Q 2019 and lower operating lease rental expense due to new accounting standing on leases (as explained in Section 5 on page 10). The Group recorded foreign currency translation gain of \$0.5 million in 4Q 2019 as compared to foreign currency translation loss of \$1.3 million in 4Q 2018 as the Australian Dollar appreciated in 4Q 2019, as compared to depreciation in 4Q 2018.

Group finance costs (interest expense) increased by 57% or \$0.5 million to \$1.3 million in 4Q 2019 from \$0.8 million in 4Q 2018 due mainly to higher interest expense of \$0.4 million as a result of the new accounting standard (as explained in Section 5 on page 10).

The Group's share of profits of joint venture decreased by 13% or \$0.4 million to \$2.7 million in 4Q 2019 from \$3.1 million in 4Q 2018 due to the absence of tax incentives that were recognised in 4Q 2018 by GBKL following the completion of its new bakery plant in Bukit Kemuning in 2018.

[^] GBKL's revenue is not consolidated as it is accounted for as a joint venture. GBKL's revenue increased 12% or \$9.4 million to \$91.1 million in 4Q 2019 from \$81.7 million in 4Q 2018

INCOME STATEMENT (cont'd)

4Q 2019 vs 4Q 2018 (cont'd)

Group PBT increased by 308% from \$5.7 million for 4Q 2018 to \$23.4 million for 4Q 2019 with margin improving from 2.7% to 10.4%. Group PAT increased by 436% to \$22.7 million for 4Q 2019 as compared to \$4.2 million for 4Q 2018. PAT margin improved from 2% in 4Q 2018 to 10.1% in 4Q 2019. The increase in Group PAT is higher than the increase in Group PBT as Rivalea's 4Q 2019 profits are presently not liable for tax due to its existing tax benefits structure. Group PATMI increased to \$22.5 million for 4Q 2019 as compared to \$4.1 million for 4Q 2018 with margin improving from 1.9% to 10%.

Underlying earnings, which excludes fair value gain on biological assets, foreign currency translation gain/loss, among others, increased by 89.2% from \$8.3 million for 4Q 2018 to \$15.7 million for 4Q 2019. Underlying earnings margin improved from 3.9% in 4Q 2018 to 7% in 4Q 2019.

The new accounting standard has no material impact on Group PBT, PAT, PATMI and underlying earnings for 4Q 2019.

Group revenue increased by 6% to \$863.9 million for financial year ended 31 December 2019 ("FY 2019") from \$814.9 million for financial year ended 31 December 2018 ("FY 2018"). In constant currency terms, Group revenue increased by 8% in FY 2019 over FY 2018. Group EBITDA increased by 67% to \$83.4 million for FY 2019 from \$50.0 million for FY 2018. Excluding the impact of new accounting standard, which resulted in an increase in EBITDA of \$9.9 million, Group EBITDA would have increased by \$23.5 million to \$73.5 million. The increase is due to better performance of Primary Production segment.

The Group's costs of materials increased by 4% or \$18.7 million to \$461.8 million in FY 2019 in line with higher sales volume in the Bakery and Distribution & Warehousing segments and higher grain prices in the Primary Production segment, partly offset by Rivalea's recognition of revaluation gain on biological assets of \$7.3 million, as compared to a \$1.7 million write-down in FY 2018.

Amortisation and depreciation increased by 31% or \$10.6 million to \$45.3 million in FY 2019 due primarily to additional depreciation charge of \$8.3 million incurred from the recognition of ROU assets (as explained in Section 5 on page 10). This was offset by a corresponding decrease in operating lease rental expense and costs of materials in FY 2019. There was also higher depreciation of \$3.2 million with the commencement of operations of the new plants in the Philippines.

Included in other operating expenses are operating lease rental expense and foreign currency translation loss. Other operating expenses decreased by 7% or \$5.6 million to \$69.7 million in FY 2019 as compared to \$75.3 million in FY 2018 due mainly to lower foreign currency translation loss and lower operating lease rental expense due to new accounting standing on leases (as explained in Section 5 on page 10). The Group recorded foreign currency translation loss of \$1.4 million in FY 2019 as compared to \$4.1 million in FY 2018 as the Australian Dollar depreciated less in FY 2019, as compared to FY 2018.

[^] GBKL's revenue is not consolidated as it is accounted for as a joint venture. GBKL's revenue increased 9% or \$26.6 million to \$337.2 million in FY 2019 from \$310.6 million in FY 2018

INCOME STATEMENT (cont'd)

FY 2019 vs FY 2018 (cont'd)

Group finance costs (interest expense) increased by 73% or \$2.4 million to \$5.8 million in FY 2019 from \$3.4 million in FY 2018 due mainly to higher interest expense of \$1.6 million as a result of new accounting standard (as explained in Section 5 on page 10), and to a smaller extent, an increase of \$1.3 million in line with higher Group's borrowings to fund capital expenditure of the Group's additional production facilities.

The Group's share of profits of joint venture decreased by 38% or \$3.7 million to \$6.0 million in FY 2019 from \$9.7 million in FY 2018 mainly due to the absence of \$5.7 million tax incentives that were recognised in FY 2018 by GBKL from its new bakery plant in Bukit Kemuning which was completed in 2018 and adjustment of \$1.4 million of benefits from tax incentives in FY 2019.

Group PBT increased by 149% from \$13.3 million for FY 2018 to \$33.1 million for FY 2019 with margin improving from 1.6% to 3.8%. Group PAT increased by 226% to \$28.2 million for FY 2019 as compared to \$8.7 million for FY 2018. PAT margin improved from 1.1% in FY 2018 to 3.3% in FY 2019. Group income tax expense increased marginally by \$0.2 million to \$4.8 million for FY 2019 as compared to \$4.6 million for FY2018, as Rivalea's FY 2019 profits are presently not liable for tax due to its existing tax benefits structure. Group PATMI increased by 239% to \$27.6 million for FY 2019 as compared to \$8.1 million for FY 2018 with margin improving from 1.0% to 3.2%.

Underlying earnings increased by 4.5% from \$22.3 million for FY 2018 to \$23.3 million for FY 2019. Underlying earnings margin was the same at 2.7% for both years.

The new accounting standard has no material impact on Group PBT, PAT, PATMI and underlying earnings for FY 2019.

STATEMENT OF FINANCIAL POSITION

Biological assets increased by 12% or \$6.5 million as at end of FY 2019 due mainly to Rivalea's recognition of \$7.3 million revaluation gain on biological assets in line with higher market prices in 2019. Inventories increased by 12% or \$8.3 million to \$75.7 million as at end of FY 2019, due mainly to higher inventory holdings by the Distribution & Warehousing business segment.

Tax recoverable increased by 53% or \$1.1 million as at end FY 2019 due mainly to payment of minimum corporate income tax by the Philippine subsidiaries during the year. Such payment is expected to be recovered over the next few years.

Short-term bond investments were fully redeemed upon maturity in FY 2019.

Cash and cash equivalents increased by \$12.9 million to \$73.2 million as at end of FY 2019, resulting mainly from \$59.4 million cash from operating activities and \$8.2 million dividends received from GBKL, offset by dividend payment of \$29.1 million and capital expenditure of \$35.5 million, including \$19.7 million for GBPI and \$9.6 million for the Primary Production business.

With the transfer of a commercial property that was previously held as investment property to owner-occupied property and reflected as property, plant and equipment as the Group has increase its usage during the year, the Group no longer carries any investment properties in the balance sheet.

Trade payables increased by 18% to \$88.9 million as at end of FY 2019 due to higher purchases in line with higher sales and higher inventory holdings.

Total short-term and long-term borrowings increased by 13% to \$122.8 million as at end of FY 2019 due to increase in funding for the Group's additional production facilities.

Other payables (non-current) increased by 16% to \$15.0 million as at end of FY 2019 due mainly to higher provision for retirement benefits during the year, in view of expected higher payouts.

With the adoption of SFRS(I) 16 Leases as mentioned in Section 5 on page 10, the ROU assets as at end of FY 2019 mainly related to leases of certain office premises, factories, warehousing/trading/farm facilities and motor vehicles. Accordingly, there was also a corresponding increase in total lease liabilities of approximately \$41.9 million as at end of FY 2019, resulting in an increase in net gearing ratio as at 31 December 2019 to 0.18 times, as compared to 0.10 times as at 31 December 2018.

The performance review of the Group's business segments is as follows:

BAKERY

In 4Q 2019, the Group's Bakery segment achieved overall increase in sales and earnings. Gardenia Bakeries (Philippines) Inc ("GBPI") achieved higher sales through the successful launch of new products, increased market penetration and increased production capacity from completion of additional bakery production lines and facilities in Mindanao and North Luzon. Bakers Maison (M) Sdn Bhd ("BMM") and Farmland Bakery (M) Sdn Bhd ("FLM") achieved higher sales in 4Q 2019 to the Group's joint venture, GBKL. GBKL's sales, which are not included in the Group's revenue, increased by 12% or \$9.4 million to \$91.1 million in 4Q 2019.

For FY 2019, Bakery segment revenue increased by 9% to \$379.4 million from \$348.5 million in FY 2018. In constant currency terms, Bakery revenue increased by 8% in FY 2019 over FY 2018. GBPI achieved higher sales through the successful launches of new products, increased market penetration and increased production capacity from the completion of additional bakery production lines and facilities. BMM and FLM achieved higher sales in FY 2019 to the Group's joint venture, GBKL, whilst Bakers Maison Australia Pty Ltd achieved higher revenue through better market reach. GBKL's sales, which are not included in the Group's revenue, increased by 9% or \$26.6 million to \$337.2 million in FY 2019. Its corresponding EBITDA, including royalty, increased by 9% to \$40.0 million with a margin of 12%.

Bakery EBITDA, excluding GBKL, increased at a lower magnitude of 3% or \$1.5 million, from \$48.7 million for FY 2018 to \$50.2 million for FY 2019, due mainly to higher operating costs arising from, among others and start-up costs related to the two new Philippine plants. Including GBKL, overall contribution of Bakery segment declined by 3% to \$61.1 million as the share of profits from joint venture declined by \$3.7 million mainly due to the absence of \$5.7 million tax incentives that were recognised in FY 2018 by GBKL from its new bakery plant in Bukit Kemuning which was completed in 2018 and adjustment of \$1.4 million of benefits from tax incentives in FY 2019.

PRIMARY PRODUCTION

In the Primary Production segment, Rivalea, the Group's leading integrated meat producer in Australia, continued to see tightening general market supply, with improvement in wholesale selling prices. The Primary Production segment is divided into three core businesses, namely meat production and sales (meat sales division), meat processing and stock feed milling divisions.

Despite lower sales volume, Primary Production revenue increased to \$90.7 million in 4Q 2019 from \$85.9 million in 4Q 2018 in constant currency terms, an increase of 6%. Rivalea continued to benefit from higher average selling prices arising from tightening of general market supply. In Singapore dollar terms, revenue was flat. However, performance of Rivalea, in particular the meat sales division, has been moderated by significantly higher grain costs in 4Q 2019 compared to 4Q 2018, due to the lagging effects of severe drought conditions experienced in Eastern Australia in 2018.

Rivalea had recorded a \$7.3 million gain in 4Q 2019 on revaluation of biological assets in line with higher market prices, as compared to a \$0.5 million write-down in 4Q 2018. Average commodity pork prices were up 37% in year ended 31 Dec 2019 compared to year ended 31 Dec 2018 and 9% in 4Q 2019 compared to 3Q 2019, which is based on reported market pricing for the industry during the respective periods. Accordingly, EBITDA for 4Q 2019 increased by \$15.3 million to \$16.0 million (including the gains resulting out of the revaluation of biological assets) as compared to \$0.7 million for 4Q 2018.

Primary Production Segment	4Q 2018 A\$'million	1Q 2019 A\$'million	2Q2019 A\$'million	3Q2019 A\$'million	4Q2019 A\$'million
Revenue	91.5	90.9	101.1	95.8	96.2
EBITDA	0.7	2.7	4.5	4.3	17.0
Depreciation and amortisation	(2.4)	(3.7)	(3.6)	(3.7)	(3.7)
Net interest expense	(0.9)	(1.1)	(1.0)	(0.9)	(0.9)
PBT	(2.5)	(2.2)	(0.1)	(0.3)	12.4

Note: EBITDA, depreciation and amortisation, net interest expense for 2019 quarters have increased as a result of SFRS(I) 16. Excluding the impact of SFRS(I) 16, EBITDA would have been approximately A\$1.2 million for 1Q 2019, A\$3.2 million for 2Q 2019, A\$2.9 million for 3Q 2019 and A\$15.5 million for 4Q 2019.

The performance review of the Group's business segments is as follows (cont'd):

PRIMARY PRODUCTION (cont'd)

Despite lower sales volume, revenue for the Primary Production segment increased by 4% or \$13.0 million from \$353.8 million in FY 2018 to \$366.8 million in FY 2019 as Rivalea continued to benefit from higher average selling prices arising from tightening of general market supply. In constant currency terms, Primary Production segment revenue increased by 10% in FY 2019 over FY 2018.

However, the performance of Rivalea, in particular the meat sales division, has been moderated by significantly higher grain costs in FY 2019, due to the lagging effects of the severe drought conditions experienced in Eastern Australia in 2018. The cost of wheat was about 60% higher as compared with 2018.

Primary Production segment EBITDA increased significantly to \$26.6 million in FY 2019 as compared to \$1.2 million in FY 2018. This substantial increase in EBITDA was achieved by higher average selling prices and savings in energy costs with the commissioning of its third biogas generator in 2019. This higher EBITDA also includes the \$7.3 million gain in FY 2019 on revaluation of biological assets. This revaluation of biological assets in FY 2019 was in line with higher market prices, as compared to a \$1.7 million write-down in FY 2018.

DISTRIBUTION & WAREHOUSING

The Group's Distribution & Warehousing segment achieved higher local sales in 4Q 2019. EBITDA for 4Q 2019 increased to \$1.8 million as compared to \$0.5 million for 4Q 2018. The increase is mainly attributable to the absence of losses of \$1.4 million incurred in 4Q 2018 in connection with the ammonia leak incident at the Group's warehouse at 1 Fishery Port Road in 2018, as well as the upgrading of the Group's warehouse.

For FY 2019, Distribution & Warehousing revenue increased by 5% or \$5.8 million to \$112.3 million, up from \$106.5 million for FY 2018, mainly contributed by higher domestic sales generated by the Group's wholesale and trading company, Ben Foods (S) Pte Ltd. Distribution & Warehousing segment revenue for FY 2018 was affected by the ammonia leak incident at the Group's warehouse at 1 Fishery Port Road in January 2018. Distribution & Warehousing segment also recognised other income of \$1.1 million in FY 2019 from its insurer, being compensation for loss of revenue and costs associated with the ammonia leak incident. Excluding the insurance compensation, segment revenue increased by 4%.

In the previous year, the segment incurred \$4.2 million losses in connection with the ammonia leak incident, as well as the upgrading of the Group's warehouse. In the absence of last year's non-recurring expenses, coupled with this year's insurance compensation, EBITDA for the Distribution & Warehousing segment increased by 204% or \$5.3 million, from \$2.6 million for FY 2018 to \$7.9 million for FY 2019.

9. Where a forecast or a prospect statement has been previously disclosed to the shareholders, any variance between it and the actual results.

No deviation.

10. A commentary at the date of announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The Group remains focused on growing its core businesses which have seen steady revenue growth and, barring unforeseen circumstances, this is expected to continue in 2020.

In Bakery, plant investments have borne fruit and some newer plants are expected to reach optimum capacity in the next two years. Planning is on-going to add bread, buns and rolls lines in Malaysia to cater to increasing demand. In the Philippines, the business strategy will be to increase bread per capita consumption through promotional activities and new product offerings, yet at the same time consolidating its expanded operations with a focus on its bottom line.

The main bread plant in Singapore has a minor refurbishment in Jan 2020 and further upgrading is being planned in conjunction with our newer facilities in the Farmland Malaysia plant in Johor.

10. A commentary at the date of announcement of the significant trends and competitive conditions of the industry (cont'd)

The coronavirus (Covid-19) outbreak has caused decline in consumer traffic in supermarkets in Metro Manila and Southern Luzon, resulting in a temporary decline in bread demand. However, sales at general trade (convenience stores) have increased. In Australia, sales to food service appear to have slowed down.

The momentum in the performance of the Primary Production business is expected to continue in the first half 2020 as pig numbers remain below last year. Branded sales of *Riverview Farms* roasted pork continues to show year on year growth. The capacity of the meat processing plant Diamond Valley Pork at Melbourne is currently being expanded with additional chiller space for carcase and boxed meat products. To be completed later this year, the A\$8 million expansion will include new slaughter and offals collection areas to cater to growing export demand from Asian customers. Rivalea is Australia's largest pork processor and leading integrated Australian pork producer with a significant presence in the Riverina region of Australia. Rivalea has extensive agricultural, processing and marketing interests that support high quality pork production for Australian and export markets.

Rivalea's operations span across 25 piggery farms (seven are owned by Rivalea with 18 contract farms owned by third parties), three feed mills and two export-accredited pork processing plants at Corowa and Melbourne. These assets are strategically located near end markets and key grain growing regions. Excluding contract farms, Rivalea operates on approximately 7,600 hectares of wholly-owned agriculture and commercial freehold land with water rights across New South Wales and Victoria. Rivalea is also planning to scale up its farming capacity in Victoria.

With an estimated 26% share of pork processing volumes in Australia as per data from Australian Pork Limited, Rivalea processes approximately 1.4 million pigs annually. It is also a leading pork producer in Australia with approximately 40,000 breeding herd, achieving more than 1 million piglet births annually with an estimated 15% share of pork production in Australia. Its feed mills can produce more than 300,000 tons of feed annually, which supplies 100% of its internal requirements and is also sold externally to independent farmers of various animal species.

Rivalea's key customers include major Australian supermarkets, wholesale butchers, food service distributors, small goods manufacturers and independent farmers. The long-standing relationships with its customer base has helped Rivalea to establish a nationwide reach of its pork products. Rivalea has sales offices in Sydney, Melbourne and Albury, sales representatives in Adelaide and Brisbane. Rivalea also operates its own wholesale and distribution operations in Melbourne and Sydney.

With a near 50-year operating track record with significant business expansion and milestones over the years, Rivalea has achieved a scale which is difficult to replicate. Rivalea's competitive position in Australia remains strong. Rivalea has an experienced management team, including two executive directors each having more than 20 years' industry experience. Rivalea has the largest private research and innovation team in Australia's pork industry, operating three innovation hubs focusing on nutrition, farming and processing to improve herd feed conversion, herd productivity and herd health. It operates its own genetics improvement program and produces genetics for its own use and for third parties.

To optimize costs, Rivalea is exploring strategic purchases of grains with additional storage facilities.

Further to the Company's 3Q2019 results announcement of November 2019, the Company has decided, after consultation with its financial advisor, Rabobank Singapore, to pursue a sale of the Primary Production business. The Company intends to focus on the Bakery and Distribution and Warehousing segments in the core markets of Singapore, Malaysia and the Philippines, within the growing 650 million population of ASEAN countries. The Primary Production business is in the animal protein segment, a very different and separate business, and operating in a different geographical region. Following nearly 20 years of ownership, the Primary Production business has reached the necessary scale and is now an ideal platform for a new owner with a strong focus on the animal protein segment to bring it to its next growth phase and take the business to the next level.

In Distribution and Warehousing, the business will continue to develop and grow proprietary branded products both domestically and regionally. Over the years, these brands have reached almost 60% of sales. The recent Covid-19 outbreak is still unfolding. Sales in the food service sector have been impacted as airlines, hotels and restaurants reduced their orders. However, sales to retail supermarkets have increased.

10. A commentary at the date of announcement of the significant trends and competitive conditions of the industry (cont'd)

The knock-on effects of this Covid-19 outbreak on the global economy are expected to be adverse. It is still too early to assess the impact on the Group's operations, although to-date, it has not had material adverse impact on the Group's operations. The Group has implemented various precautionary measures to mitigate the risk of the outbreak on the Group's operations.

Following the recent changes to quarterly reporting requirements by SGX, the Company wishes to inform shareholders that it will cease quarterly reporting with immediate effect. The Company believes that in addition to reducing manpower and other compliance costs, and enabling management to be more focused on the Group's businesses, half-yearly financial reports, and together with continuing disclosures of material information, are sufficient to keep shareholders informed. Accordingly, the Company's next results release shall be in respect of the half-year ending 30 June 2020.
