#### (b) **Discontinued operations**

As announced on 4 January 2022, the Group completed the disposal of its Primary Production business (the "Disposal") and Rivalea Holdings Pty Ltd, Oxdale Dairy Enterprise Pty Ltd, Rivalea (Australia) Pty Ltd and Diamond Valley Pork Pty Ltd have ceased to be subsidiaries of the Company.

The Group had already reclassified the business as a disposal group held for sale in accordance with SFRS(I) 5 *Noncurrent Assets Held for Sale and Discontinued Operations*. Based on the aggregate purchase price of \$153 million (A\$157 million) as stated in our announcement on 18 December 2021, the Group recorded in FY 2021, as an exceptional item, a non-cash gain on remeasurement of \$5.7 million on the Primary Production business. In compliance with SFRS(I) 5, the Group is required to cease depreciation on the assets held for sale. These resulted in a profit after tax of \$31.1 million for FY 2021 in respect of the discontinued operations. The remeasurement gain and cessation of depreciation are taken at Group consolidated accounts level and do not affect the financial results of Rivalea. Excluding such remeasurement gain and cessation of depreciation of \$16.2 million, as well as associated costs incurred for the Disposal of \$2.2 million, Primary Production business would have recorded a profit after tax of \$11.4 million for FY 2021, as compared with \$15.0 million for FY 2020. The decrease in profit after tax in FY 2021 from FY 2020 resulted from higher non-cash deferred tax expense recorded after changes in the preparation of income tax return were made following the completion of the sale transaction. Following the completion of the sale on 4 January 2022, the Purchaser issued a Completion Statement which indicates certain upward adjustment to the Purchase Price, please see page 24 for more details.

#### (c) Exceptional Items

The Group's "Exceptional Items" relates to net gain on disposal of a subsidiary.

Please see Section 8 for commentaries on the Group's Statement of Financial Position.

Note 1 Included in assets belonging to disposal group classified as held for sale are cash balances of \$41.8 million (versus \$38.7 million as at 31/12/2020) held by the Primary Production business. If not for the reclassification, the Group's cash and cash equivalents would have been \$130.5 million (\$88.7 million + \$41.8 million) (versus \$120.1 million (\$81.4 million + \$38.7 million) as at 31/12/2020).

<sup>Note 2</sup> Increase in advances to subsidiaries is due to outstanding dividends from a subsidiary.

#### 1(e) Selected Notes to the Interim Financial Statements

For the full year ended 31 December 2021

#### A. CORPORATE INFORMATION

QAF Limited (the "Company") is a public limited liability company incorporated and domiciled in Singapore. The registered address and principal place of business of the Company is 150 South Bridge Road, #09-03 Fook Hai Building, Singapore 058727.

The principal activities of the Company are those of an investment holding and management company. The principal activities of the Group consist of the manufacture and distribution of bread, bakery and confectionery products; provision for warehousing logistics for food items; trading and distribution of food and beverages; production, processing and marketing of meat; feedmilling and sale of animal feeds and related ingredients and investment holding.

#### **B. BASIS OF PREPARATION**

The condensed interim financial statements for the financial year ended 31 December 2021 have been prepared in accordance with SFRS(I) 1-34 *Interim Financial Reporting* issued by the Accounting Standards Council Singapore. The condensed interim financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance of the Group since the last annual financial statements for the year ended 31 December 2020.

#### C. USE OF JUDGEMENTS AND ESTIMATES

In preparing the condensed interim financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements and estimates made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2020.

Note: In compliance with SFRS(I) 5, the Group is required to cease depreciation (amounting to S\$8.2 million for 2H 2021 and S\$16.2 million for FY 2021) on the assets classified as held for sale. The increase in tax expense in 2H 2021 and FY 2021, compared against the corresponding periods last year, resulted from higher non-cash deferred tax expense recorded after changes in the preparation of income tax return were made following the completion of the sale transaction.

#### L. SUBSEQUENT EVENTS

There are no known subsequent events which led to adjustments to this set of interim financial statements.

### 2. Whether the figures have been audited or reviewed, and in accordance with which auditing standard or practice.

The figures have not been audited or reviewed.

3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of matter).

N.A.

4. Whether the same accounting policies and methods of computation as in the company's most recently audited financial statements have been applied.

The Group has applied the same accounting policies and methods of computation as in the Group's audited financial statements for the previous year ended 31 December 2020. However, the Group adopted new or amended Singapore Financial Reporting Standards (International) ("SFRS(I)") that are mandatory for financial years beginning on or after 1 January 2021. The adoption of these standards did not have any material effect on the financial performance or position of the Group and the Company.

5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

8. Review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. The review must discuss any significant factors that affected the turnover, costs and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors. It must also discuss any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.

#### INCOME STATEMENT (COMMENTARY ON THE FINANCIAL RESULTS)

NB: Any discrepancies in percentages included in Section 8 between the amounts shown and the corresponding percentage are due to rounding. Accordingly, figures shown as percentages in Section 8 may not be derived directly from such amounts shown.

#### 2H 2021 vs 2H 2020

#### Continuing operations

Group revenue increased by 5% to \$290.4 million for the second half year ended 31 December 2021 ("2H 2021") from \$277.5 million for the second half year ended 31 December 2020 ("2H 2020"). Group earnings before interest, tax, depreciation and amortisation ("EBITDA") before exceptional items reduced by 22% to \$33.4 million for 2H 2021 from \$42.9 million for 2H 2020. The decrease in performance of 2H 2021 as compared with 2H 2020 was largely due to higher raw materials cost in 2H 2021, especially the increase in flour prices, non-cash foreign currency translation loss in 2H 2021 and gain in 2H 2020, and higher government support in 2H 2020. Other operating expenses (resulting from the flood at a Malaysian bakery factory and higher distribution and transportation expense, amongst others) and utilities (resulting from oil and gas prices increasing by 50% from end of FY 2020 to end of FY 2021) also affected the Group EBITDA before exceptional items in 2H 2021.

The Group's costs of materials increased by 10% or \$13.8 million from \$140.5 million in 2H 2020 to \$154.3 million in 2H 2021, in line with higher raw material (particularly flour) costs and higher sales volume.

Other income including interest income and government grants reduced by 71% or \$2.4 million from \$3.4 million in 2H 2020 to \$1.0 million in 2H 2021 mainly due to the recognition of government pandemic-related grants received of \$3.0 million in 2H 2020, in connection with the Covid-19 pandemic.

Repairs and maintenance decreased 13% from \$7.6 million in 2H 2020 to \$6.7 million in 2H 2021 due to fewer infrastructure and facilities improvements implemented by Bakery segment. The Group's utilities increased by 18% from \$7.7 million in 2H 2020 to \$9.1 million in 2H 2021 while distribution and transportation expense increased by 11% from \$5.3 million to \$5.9 million due mainly to an increase in electricity, gas and fuel prices.

Advertising and promotion reduced 32% from \$4.2 million in 2H 2020 to \$2.8 million in 2H 2021 due mainly to cutback of marketing expenses by the Bakery segment.

Other operating expenses increased by 43% or \$10.0 million to \$33.2 million in 2H 2021 from \$23.2 million in 2H 2020 mainly due to non-cash foreign currency translation loss and one-off impact arising from the flood at a Malaysian bakery factory. The Group recorded foreign currency translation loss of \$2.0 million in 2H 2021 as compared with foreign currency translation gain of \$3.5 million in 2H 2020 as the Australian Dollar had appreciated vis a vis the Singapore Dollar. The flood at a Malaysian bakery factory resulted in one-off inventory write-off of \$1.3 million and one-off impairment loss on property, plant and equipment of \$3.5 million. The Group intends to seek recovery under the consequential insurance loss policy and fire insurance policy (which covers floods). Any receipt under such policies will be treated as income for financial periods after FY 2021.

#### **INCOME STATEMENT (cont'd)**

#### 2H 2021 vs 2H 2020 (cont'd)

#### Continuing operations (cont'd)

Group finance costs (interest expense) decreased by 20% or \$0.3 million to \$0.9 million in 2H 2021 from \$1.2 million in 2H 2020 due mainly to lower Group's borrowings and lower interest rates.

Following the restructuring and disposal of the Group's 55% shareholdings in Gaoyuan Pte Ltd to Jadeluck Investments Limited, a company in which our controlling shareholder has an interest, the Group recognised a non-cash exceptional accounting gain of \$1.5 million in 2H 2021.

The Group's share of profits of joint venture is marginally higher at \$3.4 million in 2H 2021 from \$3.2 million in 2H 2020. GBKL's revenue increased 5% or \$9.3 million to \$185.1 million in 2H 2021 from \$175.8 million in 2H 2020. Including the royalty income from GBKL, the contribution to the Group increased by 33% from \$4.9 million in 2H 2020 to \$6.5 million in 2H 2021.

Group profit before tax ("PBT") from continuing operations reduced by 28% or \$6.8 million from \$24.6 million for 2H 2020 to \$17.8 million for 2H 2021. Group PBT margin reduced from 8.9% to 6.1% due mainly to the exceptional high margin in 2H 2020 arising from higher demand during the pandemic which led to lower bread returns, as well as the impact of increased costs in 2H 2021.

In line with reduced Group PBT, Group total income tax expense reduced by 21% or \$0.9 million to \$3.3 million for 2H 2021 as compared with \$4.2 million for 2H 2020.

As a result, Group profit after tax ("PAT") from continuing operations reduced by \$5.9 million or 29% to \$14.5 million for 2H 2021 as compared with \$20.4 million for 2H 2020. PAT margin reduced from 7.3% in 2H 2020 to 5.0% in 2H 2021. Group profit attributable to owners of the parent ("PATMI") from continuing operations reduced by 30% to \$14.2 million for 2H 2021 as compared with \$20.3 million for 2H 2020.

#### **Discontinued operations**

In accordance with SFRS(I) 5 *Noncurrent Assets Held for Sale and Discontinued Operations*, the Group had reclassified the Primary Production business as a disposal group held for sale.

Primary Production's 2H 2021 revenue was 8% higher, resulting from higher pork sales and processing volumes. Primary Production benefitted from lower feed costs which came about with lower average wheat and barley prices in 2H 2021 compared with 2H 2020.

Based on the purchase price as stated in our announcement on 18 December 2021, the Group recorded in 2H 2021, as an exceptional item, a non-cash gain on remeasurement of \$1.7 million on the Primary Production business. In compliance with SFRS(I) 5, the Group is required to cease depreciation on the assets held for sale. These resulted in a profit after tax of \$11.1 million for 2H 2021. The remeasurement gain and cessation of depreciation are taken at Group consolidated accounts level and do not affect the financial results of Rivalea. Excluding such remeasurement gain and cessation of depreciation of \$8.2 million, as well as associated costs incurred for the Disposal of \$1.2 million, Primary Production business would have recorded a profit after tax of \$2.4 million for 2H 2021 compared with \$8.2 million for 2H 2020. The decrease in profit after tax in 2H 2021 compared with 2H 2020 resulted from higher non-cash deferred tax expense recorded after changes in the preparation of income tax return were made following the completion of the sale transaction. Following the completion of the sale on 4 January 2022, the Purchaser issued a Completion Statement which indicates certain upward adjustment to the Purchase Price, please see page 24 for more details.

#### **INCOME STATEMENT (cont'd)**

#### FY 2021 vs FY 2020

#### **Continuing operations**

Group revenue decreased marginally by \$2.8 million to \$559.0 million for the financial year ended 31 December 2021 ("FY 2021") from \$561.8 million for the financial year ended 31 December 2020 ("FY 2020"). Group EBITDA before exceptional items reduced by 30% to \$63.4 million for FY 2021 from \$90.5 million for FY 2020. The Group's exceptional performance for FY 2020 was mainly attributable to the onset of the Covid-19 pandemic which caused panic buying resulting in lower bread returns and government pandemic-related grants. Higher raw material costs, foreign currency translation loss, utilities, distribution and transportation expense and one-off impact arising from the flood at a Malaysian bakery factory also affected the Group EBITDA before exceptional items in FY 2021.

The Group's costs of materials increased by 6% or \$15.6 million to \$293.1 million in FY 2021 from \$277.5 million in FY 2020 driven by higher sales volume of the Bakery and Distribution & Warehousing segments, as well as higher raw material (particularly flour) costs.

Other income including interest income decreased by 59% or \$4.6 million to \$3.1 million in FY 2021 from \$7.7 million in FY 2020 mainly due to the recognition of lower government pandemic-related grants received of \$1.3 million (FY 2020: \$6.7 million) in connection with the Covid-19 pandemic.

Utilities increased by 10% to \$17.1 million in FY 2021 from \$15.5 million in FY 2020 while distribution and transportation expense increased by 13% to \$11.5 million from \$10.1 million due to an overall increase in electricity, gas and fuel prices.

Advertising and promotion expenses was lower at \$5.5 million in FY 2021 from \$7.4 million in FY 2020, in line with lower advertising activities by Bakery segment.

Other operating expenses increased by 14% to \$59.8 million in FY 2021 from \$52.4 million in FY 2020 due mainly to non-cash foreign currency translation loss, higher distribution and transportation expense, and one-off impact arising from the flood at a Malaysian bakery factory, partially offset by lower loss allowance for receivables. The Group recorded non-cash foreign currency translation loss of \$2.7 million in FY 2021 as compared with foreign currency translation gain of \$5.1 million in FY 2020 as the Australian Dollar had appreciated vis a vis the Singapore Dollar. Higher distribution and transportation expense is incurred mainly by Bakers Maison Australia Pty Ltd, upon the strong recovery of the growing meal kit business and general recovery in the food service sector. The flood at a Malaysian bakery factory resulted in one-off inventory write-off of \$1.3 million and one-off impairment loss on property, plant and equipment of \$3.5 million. The Group intends to seek recovery under the consequential insurance loss policy and fire insurance policy (which covers floods). Any receipt under such policies will be treated as income for financial periods after FY 2021. In FY 2021, loss allowance for receivables improved against FY 2020 because in FY 2020, there was an additional \$4.2 million provision for trade receivables relating to Gardenia Bakery Philippines Inc. ("GBPI")'s Big Smile and Bakers Maison franchise operations.

Group finance costs (interest expense) decreased by 24% or \$0.6 million to \$2.0 million in FY 2021 from \$2.6 million in FY 2020 due mainly to lower Group's borrowings and lower interest rates.

The Group's share of profits of joint venture decreased by 24% or \$1.4 million to \$4.2 million in FY 2021 from \$5.6 million in FY 2020 due mainly to higher raw material prices. GBKL's revenue decreased marginally by \$1.5 million to \$352.7 million in FY 2021 from \$354.2 million in FY 2020.

Group PBT from continuing operations reduced by 47% from \$54.4 million in FY 2020 to \$28.7 million for FY 2021 with margin reduced from 9.7% to 5.1%. Group income tax expense decreased by 48% to \$6.3 million for FY 2021 as compared to \$12.1 million for FY 2020 due to reduced profitability in the Group's operations.

Group PAT from continuing operations reduced by 47% compared to FY 2020. PAT margin reduced from 7.5% in FY 2020 to 4.0% in FY 2021. Group PATMI from continuing operations reduced by 47% to \$22.2 million for FY 2021 as compared to \$42.1 million for FY 2020, with margin reduced from 7.5% to 4.0%.

#### **INCOME STATEMENT (cont'd)**

#### FY 2021 vs FY 2020 (cont'd)

#### **Discontinued operations**

Primary Production's FY 2021 revenue increased 12% due to higher pork sales and processing volumes. Primary Production benefitted from lower feed costs which came about with lower average wheat and barley prices in FY 2021 compared with FY 2020,

Based on the purchase price as stated in our announcement on 18 December 2021, the Group recorded in FY 2021, as an exceptional item, a non-cash gain on remeasurement of \$5.7 million on the Primary Production business. In compliance with SFRS(I) 5, the Group is required to cease depreciation on the assets held for sale. These resulted in a profit after tax of \$31.1 million for FY 2021. The remeasurement gain and cessation of depreciation are taken at Group consolidated accounts level and do not affect the financial results of Rivalea. Excluding such remeasurement gain and cessation of depreciation of \$16.2 million, as well as associated costs incurred for the Disposal of \$2.2 million, Primary Production business would have recorded a profit after tax of \$11.4 million for FY 2021, as compared with \$15.0 million for FY 2020. The decrease in profit after tax in FY 2021 from FY 2020 resulted from higher non-cash deferred tax expense recorded after changes in the preparation of income tax return were made following the completion of the sale transaction. Following the completion of the sale on 4 January 2022, the Purchaser issued a Completion Statement which indicates certain upward adjustment to the Purchase Price, please see page 24 for more details.

#### STATEMENT OF FINANCIAL POSITION

Inventories increased by 13% from \$45.2 million as at end of FY 2020 to \$50.9 million as at end of FY 2021 due mainly to higher inventory holdings in anticipation of increasing supply costs and disruptions to supply chain.

Other receivables increased by 56% or \$9.7 million from \$17.5 million as at end of FY 2020 to \$27.2 million as at end of FY 2021 largely due to trust monies receivable of \$8.6 million relating to deposit received upon signing of the sale and purchase agreement to dispose of the Primary Production business.

Tax recoverable increased by 42% or \$1.9 million from \$4.5 million as at end of FY 2020 to \$6.4 million as at end of FY 2021 due mainly to the Philippines group of companies' accumulated certificates of creditable tax withheld. Philippines tax regulations mandate the advance withholding of tax for selected transactions which is paid directly to the tax authority and are useable as income tax credits. The excess creditable withholding taxes may be carried forward to succeeding years until fully utilised.

Cash and cash equivalents for the Group (including disposal group) increased by \$10.4 million from \$120.1 million as at end of FY 2020 to \$130.5 million as at end of FY 2021, resulting mainly from positive cash from operating activities of \$109.2 million and \$6.5 million dividends received from GBKL, offset by repayment of borrowings and lease liabilities of \$43.8 million, capital expenditure of \$30.1 million and dividends payment of \$29.1 million.

Right-of-use assets reduced by \$3.4 million from \$25.8 million as at end of FY 2020 to \$22.4 million as at end of FY 2021, mainly due to depreciation of the assets during the year of \$3.7 million.

Trade payables increased by \$18.6 million from \$43.1 million as at end of FY 2020 to \$61.7 million as at end of FY 2021, due to higher inventory holdings.

Total short-term and long-term borrowings decreased by 25% from \$44.1 million as at end of FY 2020 to \$33.0 million as at end of FY 2021 due to repayment of loans. Net gearing ratio (including disposal group) as at 31 December 2021 was (0.01) times as compared with 0.09 times as at 31 December 2020.

Other payables (non-current) decreased by 24% to \$9.1 million as at end of FY 2021 due mainly to lower provision for retirement benefits, in view of lower expected payouts as well as additional employer contribution made during the year to the plan asset to fund the future retirement benefits obligations.

Total lease liabilities decreased by 12% from \$27.2 million as at end of FY 2020 to \$23.9 million as at end of FY 2021 due to payments made.

#### BAKERY

The Group's Bakery segment achieved overall increase in sales in 2H 2021 by 4% to \$220.1 million from \$212.6 million in 2H 2020. Higher costs of materials, distribution and transportation expense and utilities posed a significant pressure on the segment. These costs increase, together with lower government pandemic-related grants, reduced Group's Bakery segment EBITDA from \$36.5 million for 2H 2020 to \$31.3 million for 2H 2021. Overall EBITDA margin for the Bakery segment reduced from 17% for 2H 2020 to 14% for 2H 2021. GBKL's sales, which were not included in the Group's revenue, increased by 5% or \$9.3 million to \$185.1 million in 2H 2021.

#### The performance review of the Group's business segments is as follows (cont'd):

Continuing operations (cont'd)

#### BAKERY (cont'd)

Including GBKL, overall EBITDA contribution of Bakery segment reduced by 9% or \$3.6 million from \$41.4 million for 2H 2020 to \$37.8 million for 2H 2021.

For FY 2021, Bakery segment revenue reduced by 2% to \$425.1 million from \$433.3 million in FY 2020. The Group's Bakery segment achieved exceptional performance in FY 2020 with higher demand triggered by the onset of the Covid-19 pandemic. Coupled with the increasing costs and lower pandemic-related grants from governments in FY 2021, EBITDA reduced by 24% or \$19.3 million, from \$79.6 million for FY 2020 to \$60.3 million for FY 2021. Including GBKL, overall EBITDA contribution of Bakery segment reduced by 22% or \$19.6 million, from \$90.0 million for FY 2020 to \$70.4 million for FY 2021.

However, when compared with the pre-Covid situation in FY 2019, the Group's Bakery segment revenue increased by 12% or \$45.7 million from \$379.4 million for FY 2019 to \$425.1 million for FY 2021, and EBITDA increased by 20%, from \$50.2 million for FY 2019 to \$60.3 million for FY 2021.

The contribution to the Group from our share of profits of joint venture and royalty income from GBKL declined by 7% from \$10.9 million in FY 2019 to \$10.1 million in FY 2021. The decline in FY 2021 is mainly due to higher costs related to the pandemic and in 4Q 2021, a sharp spike in costs of materials.

#### **DISTRIBUTION & WAREHOUSING**

The Group's Distribution & Warehousing segment achieved an increase in revenue by 7% or \$4.2 million to \$67.7 million in 2H 2021, up from \$63.5 million for 2H 2020. The increase is mainly contributed by higher food services and export sales, partly offset by lower sales to retail supermarkets. EBITDA for 2H 2021 increased to \$2.8 million as compared with \$2.6 million for 2H 2020.

For FY 2021, Distribution & Warehousing segment revenue increased by 4% or \$4.9 million to \$128.9 million, up from \$124.0 million for FY 2020, mainly contributed by higher food services and export sales, partly offset by lower sales to supermarkets. Although revenue had increased, EBITDA for the Distribution & Warehousing segment decreased by 9% or \$0.6 million, from \$7.0 million for FY 2020 to \$6.4 million for FY 2021. This decrease resulted mainly from operating profits falling by \$0.9 million with higher cost of products and increased warehousing costs due to higher inventory levels. Government pandemic-related grants were also \$1.3 million lower. However, in FY 2020, there was a \$1.0 million impairment loss on property, plant and equipment and this moderated the decrease in EBITDA in FY 2021 compared with FY 2020.

Primary Production	211.1	194.8	8	27.5	20.5	34	13	11

In the Primary Production segment, Rivalea Holdings Pty Limited ("Rivalea") achieved 8% revenue growth or \$16.3 million from \$194.8 million in 2H 2020 to \$211.1 million in 2H 2021. This was mainly driven by higher pork sales and processing volumes despite a weakening in the wholesale selling prices. Primary Production's EBITDA for 2H 2021 increased by 34% or \$7.0 million to \$27.5 million as compared with \$20.5 million for 2H 2020.

416.8	373.2	12	46.5	35.9	30	11	10	

For FY 2021, revenue for the Primary Production segment increased by 12% or \$43.6 million from \$373.2 million in FY 2020 to \$416.8 million in FY 2021, and EBITDA increased by 30% or \$10.6 million from \$35.9 million in FY 2020 to \$46.5 million in FY 2021. Primary Production saw lower feed costs which resulted from lower wheat and barley prices in FY 2021 as compared with FY 2020, due to a better harvest in late FY 2020.

As announced on 4 January 2022, the Group completed the disposal of its Primary Production business (the "Disposal") and Rivalea Holdings Pty Ltd, Oxdale Dairy Enterprise Pty Ltd, Rivalea (Australia) Pty Ltd and Diamond Valley Pork Pty Ltd have ceased to be subsidiaries of the Company. Based on the purchase price as stated in our announcement on 18 December 2021, the Group recorded in FY 2021, as an exceptional item, a non-cash gain on remeasurement of \$5.7 million on the Primary Production business. In compliance with SFRS(I) 5, the Group is required to cease depreciation on the assets held for sale. This resulted in a profit after tax of \$31.1 million for FY 2021. The remeasurement gain and cessation of depreciation are taken at Group consolidated accounts level and do not affect the financial results of Rivalea. Excluding such remeasurement gain and cessation of depreciation business would have recorded a profit after tax of \$11.4 million for FY 2021 as compared with \$15.0 million for FY 2020. The decrease in profit after tax in FY 2021 from FY 2020 resulted from higher non-cash deferred tax expense recorded after changes in the preparation of income tax return were made following the completion of the sale transaction. Following the completion of the sale on 4 January 2022, the Purchaser issued a Completion Statement which indicates certain upward adjustment to the Purchase Price, please see page 24 for more details.

#### Overall Group operations

On overall group level including both continuing and discontinued operations, FY 2021 revenue was 4% and 13% higher than FY 2020 and FY 2019, respectively. FY 2021 EBITDA was 13% lower with the normalisation of the Bakery business against FY 2020 but was 32% higher than FY 2019. FY 2021 PATMI was 88% higher than FY 2020 as the previous year was affected by the non-cash remeasurement loss of \$28.7 million on the discontinued Primary Production business. Excluding remeasurement losses in FY 2021 and FY 2020, PATMI would have decreased by \$10.0 million or 18% largely due to the normalisation of the Bakery business offset by a \$9.8 million improvement from the discontinued operations. Compared with FY 2019, Group PATMI's improved 89%, with 22% and 218% growth from continuing and discontinued operations respectively.

#### **Continuing operations**

Based on government statistics, the Singapore economy recovered by 7.6% in FY 2021 after the 5.4% decline in FY 2020 while Malaysia's rebounded by 3.1% from a 5.6% fall the previous year. The Philippine government recently announced that its economy recovered 5.6% after shrinking 9.6% in FY 2020. The International Monetary Fund estimated that Australia's economy grew 3.5% in FY 2021 after declining 2.4% in FY 2020. Although there was economic recovery in core markets in which the Group operates, the recovery of the regional economies in FY 2021 was largely due to the low base in FY 2020 during the onset of the Covid-19 pandemic.

Various forms of pandemic-related restrictions have been imposed by governments in these countries, in response to new waves of Covid-19 infections arising from new variants. The pandemic continues to cast uncertainty over the business environment and has affected the economies of our core markets, which resulted in lower household consumption. Singapore had rolled back its planned reopening in May 2021 after a resurgence of Covid-19 cases. The Philippines had also prolonged its lockdown measures into 2021. In Malaysia, severe lockdown measures were reimposed on several occasions. Lockdown measures were reintroduced in Australia, after outbreaks of the new Covid-19 Delta variant in June 2021 and Omicron variant in December 2021.

As mentioned in our FY 2020 results announcement and annual report, FY 2020 was an exceptionally good year for the Bakery business which was expected to moderate as our business started to normalise in FY 2021. In line with such commentary. Group Bakery revenue for FY 2021 fell against last year by 2% from \$438.1 million to \$431 million and EBITDA fell 22% from \$90 million to \$70.4 million. However, compared with the pre-Covid situation in FY 2019, Group Bakery revenue grew by 12% from \$384.3 million to \$431 million and EBITDA was 15% higher from \$ 61.1 million to \$70.4 million. The significant increase in revenue in FY 2021 compared with FY 2019 was supported by strategic investments in heavy expansion capex of \$200 million in the 4-year period before FY 2020. These investments significantly increased our production capacity and enable the Group to achieve better economies of scale. This was in line with our strategy of pursuing organic growth. Although business has normalised, our performance in the Bakery segment in these markets was relatively steady compared with the general industry for fast moving consumer products. For Bakers Maison Australia Pty Ltd ("BMA"), after initial setbacks in its sales to food service and airline customers when the pandemic started, the company had seen strong recovery in June 2020 with the growing meal kit business and general recovery in the food service sector that continued into 1H 2021. In 2H 2021 with further outbreaks of Covid-19 cases in Australia, BMA's business in the food service sector has again been affected, although to a lesser extent than the year before. Notwithstanding these outbreaks, BMA achieved its best performance to-date.

In the Distribution & Warehousing segment, being nimble and responsive to changing market demand have helped us to maintain continued year-on-year sales increase in FY 2021. Notably, decisions to increase inventory and diversification of suppliers helped us to avoid inventory shortage situations and even allowed us to expand our product range during the year. While sales growth in FY 2020 was largely attributable to supermarkets and exports, the growth in FY 2021 was largely attributable to the recovery in the food service sector. However, owing to the disruptions to our supply chain caused by the pandemic, costs have increased (for example, higher cost of products from suppliers and higher warehousing cost because of increased inventory) and margins have contracted. This was partly caused by food manufacturers worldwide facing difficulty meeting demand and disruptions in the shipping industry which increased shipping costs. EBITDA in FY 2021 of \$6.4 million is lower than FY 2020's \$7 million due mainly to lower amount of grants received in connection with the Covid-19 pandemic, higher cost of products and increased warehousing costs. Compared against FY 2019 operating EBITDA of \$6.8 million (excluding the insurance compensation), EBITDA is \$0.4 million lower as a result of higher cost of products and increased warehousing costs. The \$2.5 million repair works on the roof structure of our warehouse which started in May 2021 is expected to be fully completed by February 2022. The repair works had reduced our coldroom capacity by 30% and we expect full capacity utilisation from March 2022 onwards.

## 10. A commentary at the date of announcement of the significant trends and competitive conditions of the industry (cont'd)

#### Continuing operations (cont'd)

The Group remains committed to its corporate social responsibility and will continue to give back to the lowerincome community. For example, GFS has continued to donate bread products to underprivileged communities. GBKL has continued to work closely with government agencies and NGOs to provide products and cash to help those financially affected by the COVID-19 pandemic. GBPI remains focused on bread donations to crisis-affected poor communities and COVID-19 frontline workers in hospitals and security checkpoints, and other essential services workers. Immediate bread donations were also made in the aftermath of typhoons that hit the Philippines this year. Including our joint-venture company, GBKL, donations of \$2.8 million were incurred by the Group in FY2021. The Group also incurred expenses for vaccines and other workplace safety measures necessary to mitigate the pandemic risks.

Further to our announcement dated 6 August 2021, we completed the restructuring of and exited our entire stake in Gaoyuan Pte Ltd ("Gaoyuan") on 20 December 2021. An accounting gain of \$1.5 million was recognised from this restructuring and settlement of the consideration of S\$3,768.60 was made pursuant to the sale to a company in which our controlling shareholder has an interest. The consideration was determined, taking into consideration that, Gaoyuan together with its subsidiaries, was technically insolvent and the net asset value of our stake was negative \$1.5 million.

In November 2021, we incorporated a new wholly-owned subsidiary, Straits Foods (S) Pte Ltd, with issued and paid-up capital of S\$1.00 to explore new trading opportunities in ASEAN. Our Group also invested approximately S\$0.5m in paid-up capital in a newly-incorporated wholly-owned Philippine subsidiary, Gardenia (Philippines) Trading and Distribution Corp. in January 2022 to engage in trade and distribution operations in the Philippines, as a strategic move to diversify from the Bakery segment.

#### **Discontinued operations**

Continuing from 2020, the Primary Production business did well in 2021, achieving sales of \$417 million and EBITDA of \$46.5 million. Sales went up by 12% and EBITDA improved 30%. The business continued to benefit from the lower grain prices since 2020 when the severe drought of 2018 to 2019 ended.

We have announced on 4 January 2022 the completion of the sale of the Primary Production business to an Australian subsidiary of JBS S.A. ("JBS") and A\$157 million (S\$153 million) has already been received from the purchaser on Completion which amount was based on an estimate of the defined financial conditions as at 30 November 2021. The final amount to be settled will be based on the defined financial condition of the Primary Production business as at 31 December 2021, taking into account:

- (a) the aggregate enterprise value of A\$175.0 million (approximately S\$171.7 million);
- (b) the aggregate actual net external debt;
- (c) the aggregate actual related party balances between the vendors and Rivalea Group; and
- (d) the aggregate actual net working capital, measured against the pre-agreed net working capital amount.

On 16 February 2022, JBS issued a Completion Statement of the amount to be settled and based on such Completion Statement, the amount has to be adjusted upwards by A\$0.3 million. The Group is still reviewing the Completion Statement and will make the necessary announcement in due course on the final amount to be adjusted.

It is expected that there will be no material impact from the completion of the sale on the Group's results for FY 2022. However:

(a) If additional costs are incurred in FY 2022, there will then be a negative impact on profit before tax and total comprehensive income, although the impact is not expected to be material.

## 10. A commentary at the date of announcement of the significant trends and competitive conditions of the industry (cont'd)

#### **Discontinued operations (cont'd)**

- (b) For FY 2022, there will be a non-cash \$7.7 million translation loss resulting from the reclassification of foreign currency translation reserve from the equity on the balance sheet to the profit and loss statement in accordance with Singapore Financial Reporting Standard (International) 1-21. This is an accounting requirement following the completion of the disposal of the Primary Production business. However, a corresponding gain of \$7.7 million will be recorded in other comprehensive income.
- (c) The Completion Statement issued by the Purchaser on 16 February 2022 is currently being reviewed by the Group and the final amount to be adjusted upwards will be reflected in the Group's results for FY2022.

#### <u>Outlook</u>

The International Monetary Fund (IMF) recently announced that it expects global growth to moderate from 5.9% in 2021 to 4.4% in 2022. This forecast took into consideration the removal of fiscal policy package, earlier withdrawal of monetary accommodation and continued supply shortages for the United States, as well as pandemic-induced disruptions and protracted financial stress among property developers in China. The IMF also highlighted that the emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. The United Nations Food and Agriculture Organization (FAO) estimated that global wheat prices had increased 31% over the year 2021. In November 2021, wheat traded at its highest prices in nine years. High energy prices are also an increasing risk concern with oil and gas prices increasing by about 50% from end of FY 2020 to end of FY 2021 and trading near 7-year highs during the last quarter of FY 2021 to early January 2022. Volatile energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies and will likely continue to cast uncertainty in the business environment. In Singapore, inflation rose to 4 per cent in December, exceeding economists' expectations and prompting the authorities to review their 2022 forecasts. In December 2021, unemployment rate in Australia dived to its lowest level since 2008 which will pose staff cost and hiring challenges for our remaining operations in Australia. Accordingly, inflationary pressures are expected to continue into FY 2022, particularly in the first half.

The pandemic situation in our core markets of Singapore, Malaysia, the Philippines and the other regional economies has continued to pose operational challenges leading to increased costs. In particular, the pandemic has continued to severely disrupt production, supply chains and movement of labour. Since the last guarter of FY 2021, we saw the beginning of the increase of our cost of operations, especially higher raw material, distribution and utility costs. The inflationary pressures have been fuelled by amongst others, producer price increases, persistent supply side disruptions and labour shortages, and volatile high energy costs. For example, flour costs expense, which is the biggest component of our costs of materials, has increased by approximately 4% in FY 2021 compared with FY 2020. However, this increase does not fully reflect the impact of the increase in the cost of flour in the last quarter of FY 2021, which increase will be felt in FY 2022 due to the lagging effect of flour price increases. Typically, we purchase flour in advance on a quarterly basis and thus any increase in such costs will only be felt subsequently. Average flour price since the end of FY 2020 has gone up by more than 20%, the increase having started from the last quarter of FY 2021. For Gardenia Singapore, flour price has increased by another 15% for 1Q 2022 from 4Q 2021 and is estimated to increase further in 2Q 2022 with more than 20% increase from 4Q 2021. Compared with 2H 2020, the Group distribution and transportation expense has increased by 11% while utility cost has also increased by 18% as oil and gas prices have increased by about 50% in FY 2021. Our costs are therefore expected to increase significantly in 1H 2022. To mitigate the challenges of cost escalation arising from inflationary pressures, strategic steps such as product innovations, adjustments to product mix and selling prices have been and will be taken. The selling price adjustments are however moderated by keeping our prices competitive.

### 10. A commentary at the date of announcement of the significant trends and competitive conditions of the industry (cont'd)

#### Outlook (cont'd)

In December 2021, unprecedented torrential rain throughout Peninsular Malaysia caused severe flooding across several states. One of Gardenia Malaysia's factories was adversely affected and had to be shut down. A one-off loss adjustment of \$4.8 million has been made for damaged inventory and fixed assets. To a certain extent, the shutdown of this factory is expected to affect Gardenia Malaysia's total supply of bakery products for FY 2022. During the period of replacement or reinstatement, there will be no revenue generated from the affected lines of production in FY 2022. The financial contribution from the affected lines of production will therefore cease until the requisite replacement or reinstatement works are completed and the lines are fully operational and this will have an impact on performance of Gardenia Malaysia. Local management has taken strategic measures to mitigate the impact of this factory shutdown, including ramping up production of other factories, changing product mix and temporary outsourcing of production to other contract manufacturers.

In view of the above, barring unforeseen circumstances, the operating performance of the continuing business in 1H 2022 is expected to be challenging as compared to 1H 2021. The ongoing pandemic situation, inflationary pressures and geopolitical tensions have created heightened uncertainty and this has made it challenging to comment on the trend for 2H 2022, although typically, the 2H operating performance would be better than the 1H operating performance.

Our commentary on the operating performance for FY 2022 does not take into account recovery under the consequential insurance loss policy and fire insurance policy (which covers floods). Gardenia Malaysia is in the process of seeking recovery under such policies and any payment under such policies will be treated as income for the financial period after FY 2021. Repair and replacement of damaged factory installations are currently being planned, taking into consideration the insurer's assessment of the damage and the Group's proposal for the repair and replacement.

In line with the strategy of sustainable long-term growth, we will continue to pursue our current strategy of pursuing organic growth. At the same time, we are looking into new investment opportunities to grow and expand our existing core businesses. The receipt of cash proceeds of S\$153 million (A\$157 million) (which amount is subject to upward adjustment as mentioned on page 24 above) from the disposal of the Primary Production business will enable the Group to pursue organic growth, which will require significant capital expenditure, with some degree of confidence. The stronger cash position of the Group will also allow us to pursue new business opportunities in the food industry as part of our diversification strategy.

During the period of FY 2016 to FY 2019, the Group had invested in expansion capex of approximately \$200 million to expand our overall bakery production capacity. This was in line with our strategy of pursuing organic growth. As a continuation of this strategy, we plan to further invest in expanding our production capacity for our core markets in Singapore, Malaysia and the Philippines. The aggregate investment is estimated to be approximately \$116 million. Given the age of the plant in Singapore, we are planning to upgrade our production facilities in Singapore. A key aspect of the upgrading works will be automating the process of packing finished products. This automation will address the general shortage of workforce in Singapore and cut future manpower costs. Some improvements have already been made to our plants in Singapore in FY 2021. GBKL's new bun and roll line at Bukit Kemuning has also been completed on time and within budget in 2H 2021. Further expansion plans in Malaysia will take into account, amongst others, the recent factory shutdown arising from the flood in December 2021 and any temporary shutdown in Singapore required for upgrading works. Gardenia Philippines is nearing completion of the construction of the factory structure to house new production lines at North Luzon. However, the installation of the production lines at this location is still being reviewed, taking into consideration the economic environment and our expectation of increased market competition.

The Group's balance sheet was strengthened in January 2022 with the sale proceeds from the discontinued operations. This will facilitate the pursuit of our strategy of value creation to enhance shareholders value, balanced by our prudent capital management policy and the need to support expansion capex and other investments. Accordingly for FY 2021, the Board has decided to recommend a final dividend of \$0.04 per share. Together with the interim \$0.01 dividend paid in 2021, the total dividend for FY 2021 would amount in total to \$0.05 per share or total of \$28.8 million, although our FY 2021 profit after tax from continuing operations attributable to shareholders is \$22.2 million.
